- Safe analgesic option for cardiac patients undergoing short surgical procedures.
- It is also used widely by the ambulance service and in hospitals for a variety of procedures and conditions.
- PAIN RELIEF GAS an ideal analgesic for treating patients in the pre-hospital setting as well as accident and emergency departments.

## PAIN RELIEF GAS KIT

### BENEFIT OF USING PAIN RELIEF GAS

- ★ Effective pain relief and sedative effect without loss of consciousness.
- ★ Easy-to-use, convenient in handling and maintenance at negligible cost.
- ★ Easy, Self Regulated Administration, therefore you are in full control of your own pain relief requirements. The effects of the Pain Relief Gas will felt after approximately 6-8 inhalations. After stopping inhalation, the gas and its effects wears off. Within eight minutes it will have disappeared completely from your body. Due to this you will not need anyone to look after you for twenty four hours afterwards.
- ★ Non-invasive, analgesic and can be combined with all other analgesics.
- ★ Can be inhaled with a Repid onset/offset action.
- ★ Not only analgesic but contains sedative and anxiolytic properties.

### Kit Consists of

1. Cylinder
2. Two auto Clave niasks
3. Regulator
4. Demand Valve
5. Tube
6. Bag

Safe and effective Short term  
pain relief
